[e.g. 3D modelling,
VRChat development,
design]

Note: *You may add a second Team slide if needed.*

Selected Location

NEXT

SELECTED LOCATION

[Name of the building / university location]

[Briefly describe the selected location and its role at the university — max. 2 sentences.]

MODELLED SCOPE

- [List the areas included in your virtual model.]

[Insert a main photo of the location]

[OPTIONAL: Add 1–3 additional reference photos]

[Insert a main screenshot of your virtual model]

[Add 1–3 additional screenshots if needed]

Digital Artefacts

NEXT

[Artefact name]

[Insert screenshot /
image]

[Briefly describe the artefact and
its role in the virtual environment.]

[Artefact name]

[Insert screenshot /
image]

[Briefly describe the artefact and
its role in the virtual environment.]

[Artefact name]

[Insert screenshot /
image]

[Briefly describe the artefact and
its role in the virtual environment.]

Technical Implementation

NEXT

Tools and software

[List the main tools used.]

Development process

[Briefly describe the main stages of creating the model.]

VRChat integration

[Explain how the created assets were integrated and tested in VRChat.]

Technical challenges

[Optional: mention 1–2 key challenges and how you addressed them.]

Note: *You may use additional slides if needed to explain the technical implementation clearly.*

Integration into NEXT-Study Metaverse

NEXT

Educational use

[How can students or teachers use this virtual location?]

User experience

[What can visitors explore, learn or do in this environment?]

Further development

[How could the model be extended or enriched in the future?]

Demo and Project Materials

NEXT

Project demo

[Insert a QR code or link to the VRChat environment / video demonstration.]

Project materials

[Add links to the project files, source code, 3D assets or other submitted materials.]

Additional resources

[Add any other relevant links or documentation.]

Note: Make sure all links and QR codes are accessible and working.
